

When it comes to
ocean pollution...
don't trade your voice to
an evil Sea Witch!

Raise your Voice,
Not the sea level!

80% of water pollution is
from land based activities
like factories and farming,
and only 20% from sea based
activities like boat sewage
and oil spills!!!

World Environment Day (WED) is the United Nations' principal vehicle for encouraging worldwide awareness and action for the environment. Over the years it has grown to be a broad, global platform for public outreach that is widely celebrated by stakeholders in over 100 countries. It also serves as the 'people's day' for doing something positive for the environment, galvanizing individual actions into a collective power that generates an exponential positive impact on the planet.

In support of the UN designation of 2014 as the International Year of Small Island Developing States (SIDS), WED this year will adopt SIDS in the broader context of climate change as its theme.
